IMPAYROLL

Empowering Global Workforce Automation

Module: Income Tax Settings & Calculation

The Income Tax Settings & Calculation module in IMPAYROLL ensures complete compliance with regional tax regulations through automation. It handles multi-country tax frameworks, progressive brackets, exemptions, and deductions, providing accurate salary calculations for every employee in real time.

Empowering Global Workforce Automation

Attendance & Attendance Settings Module

Aqril Smith

1. Module Overview

The Income Tax module is designed to simplify the complex process of tax compliance across countries and jurisdictions. IMPAYROLL enables administrators to define country-specific tax rules, income brackets, and deduction categories while automating calculation for each pay cycle.

2. Key Components

• **Tax Settings Dashboard:** A centralized interface to define tax brackets, set income ranges, and assign exemption rules for various countries.

• **Employee Tax Profile:** Displays tax-related data at the individual level, including gross income, deductions, taxable income, and withholding summary.

• **Tax Summary Report:** Offers aggregated insights into total withholdings, compliance rates, and regional variations through charts and tables.

3. Tax Calculation Workflow

1. **Define Tax Rules:** Administrators configure country-specific tax systems, defining slabs, brackets, and rates.
2. **Assign Employee Profiles:** Employees are mapped to relevant country and tax bracket settings.
3. **Automated Calculation:** During payroll processing, IMPAYROLL automatically computes tax deductions based on configured parameters.
4. **Reporting & Auditing:** The system generates reports for statutory filings and internal reviews.

4. Business Impact & Value

• **Accuracy:** Minimizes human error with real-time automated tax deduction.
• **Compliance:** Adheres to international and regional tax regulations.
• **Transparency:** Provides employees with detailed tax breakdowns.
• **Efficiency:** Saves significant administrative effort by automating calculations.
• **Scalability:** Easily adapts to different tax systems for multinational organizations.

5. Future Enhancements

Planned updates include AI-based tax prediction models, real-time legislative updates, and auto-generated digital tax certificates for year-end filings.

Next Module Preview: Employee Management

The upcoming module focuses on managing the complete employee lifecycle — from onboarding and document management to job transitions, benefits tracking, and separation workflows — integrated seamlessly with payroll and compliance settings.
